Create and develop complex systems. Versatile programmer with experience in game engines, programming languages, web development, and app development. Worked alongside multiple people in team environments. Passionate about experiencing and developing software. Motivated to learn and grow.

PROJECT EXPERIENCE

Gameplay Programmer - Tachyon (2026 - Present)

- Architected a replicated, physics-based vehicle movement system in Unreal Engine 5, optimized to support smooth, low-latency replication for up to 4 players.
- Discussed with designers and translated complex abstract ideas into scalable architecture and mathematical solutions.
- Worked in Unreal Engine 5 Systems through instructor guidance, time organization, and well throughout goals, accomplishing efficient skill transfer to Unreal from Unity.
- Turned Tachyon into a developed product with a team through the use of Unreal, Jira, and confluence.
- Planning to fully publish Tachyon on Itch and Steam.

Gameplay Programmer - GUNCH (2025 -2026)

- Developed a Unity first person Gameplay system using physics, raycasts, and interfaces for Movement, weapons, and abilities.
- Designed and implemented extensible AI Behavior trees and sensor systems using Unity Navmesh, enabling dynamic enemy pathfinding, tactical positioning, and state-driven combat responses.
- Participated in a 4 person team with designers and artists to create a FPS game using Unity, Trello, and Git.
- Implemented and developed a fun dynamic FPS game.

Lead Gameplay Programmer - NekoFish (2024 - 2025)

- Engineered a modular, data driven fishing mechanic framework in unity, allows designers to configure fish behaviours through Scriptable Objects.
- Directed a 5 person team on a year long game development project using tools like Trello and Git.
- Connected with industry partners for game discussions and feedback by LinkedIn .
- Successfully created a full Unity fishing game over a 8 month period.

EDUCATION

Vancouver Film School (2025 - 2026)

Programming for Games, Web, and App.

Sisler CREATE IDM (2024 - 2025)

Game Design course for Post High Graduates.

École Secondaire Sisler High (2020 - 2024)

Highschool Diploma.

SKILLS
